Call For Papers

(January - June 2017) Volume: 4 No: 1

Mobile application development is the process by which application software is developed for low-power handheld devices which can be pre-installed on phones during manufacturing, downloaded by customers from various mobile software distribution platforms, or delivered as web applications using server-side or client-side processing (e.g. JavaScript) to provide an "application-like" experience within a Web browser. i-manager's Journal on Mobile Applications and Technologies focus on how innovative applications and technologies will change our daily lives and how it will redefine businesses across industries. The objective of the Journal on Mobile Applications and Technologies is to offer comprehensive coverage and understanding of all aspects of e-services, self-services and mobile communication from different fields including marketing, management, and MIS Mobile phone applications demanding greater resources and improved interactivity for better user experience.
